ABOUT COMPANY

JKP Projects is a leading Metal Fabrication, Jig Fixture Manufacturing and Trading company specializing in **Fabrication work:** Structure , Plateform, Workding Station, Water/Air/Gas/Fire Pipeline.

Ducting Work: Air Washer, Fume Suction and we are capable of supply and installation of Air Washer and Fume Suction Unit.

Jig & Fixture : We are manufacturing various types of jigs and fixtures as per the requirement of our customers with a strong focus on quality, innovation, and customer satisfaction, we have established ourselves as a trusted partner for businesses worldwide.

Our state-of-the-art manufacturing facilities and trading items are equipped with the latest technology and operated by a team of highly skilled professionals. This enables us to deliver precision-engineered products that meet the most demanding standards.

At JKP Projects, we understand the importance of agility and adaptability in today's fast-paced market. Our flexible production processes allow us to customize solutions according to our clients' unique requirements, ensuring optimal performance and cost-effectiveness.

Mrs. Kanta Rani, Founder

FOUNDER MESSAGE

Welcome to JKP Projects, where innovation meets excellence in fabrication and trading solutions.

At JKP Projects, our mission is simple yet profound – to deliver exceptional value to our clients and partners through a relentless pursuit of quality, integrity, and innovation.

As the Founder of this dynamic organization, I am proud to lead a team of dedicated professionals who are committed to pushing boundaries, embracing challenges, and delivering results that exceed expectations.

Our collaborative approach, fueled by strategic partnerships and a deep understanding of market dynamics, allows us to stay ahead of the curve and anticipate the evolving needs of our clients.

We are not just a fabrication and trading company; we are a catalyst for growth, a trusted advisor, and a reliable partner on your journey towards success.

Our team of experienced engineers works closely with clients to design custom jigs and fixtures tailored to their specific needs. We continuously refine our processes and embrace new technologies to maintain our position at the forefront of the industry.

OUR VISION & MISSION

VISION

Our vision at JKP Projects is to revolutionize the fabrication and trading industry by becoming the preferred choice for businesses worldwide. We aspire to: Innovate Continuously, Deliver Excellence, Empower Partnerships, Drive Sustainable Growth, Empower Our Team & Inspire Industry Leadership.

MISSION

At JKP Projects, our mission is to be a leader in the fabrication and trading industry by consistently delivering innovative, high-quality products and services that exceed customer expectations. We are committed to : Excellence, Innovation, Quality, Customer satisfaction, Sustainability, Collaboration and Employee Development,,

We works to deliver exceptional value to our clients and partners through a relentless pursuit of quality, integrity, and innovation

Vision

Mission

OUR SERVICE

○ **FABRICATION PROJECT**

Fabrication work involves the creation of structures, components, or products through cutting, shaping, joining, welding and assembling various materials. It encompasses a wide range of industries and applications, from manufacturing and construction to automotive and aerospace engineering.

○ **JIG AND FIXTURE MANUFACTURING**

We are manufacturing various types of jigs and fixtures as per the requirement of our customers to get the required quantity without affecting the quality of the parts. We support different two wheelers frame, swing arm and fuel tank fixtures & inspection jig, drill jigs, VMC system fixtures, finish testing attachments. These jigs and attachments are made on specific machines such as Lathe Machine, MITR machine, Surface Grinder, ARC Welding Set, MIG Welding Set, Power Hexa, Gas Cutter.

○ **FUME SUCTION DUCTING WORK**

Fume suction ducting work involves the design, installation, and maintenance of ductwork systems used to remove hazardous fumes, gases, vapors, and airborne particles from industrial processes or laboratory environments. These systems are critical for maintaining air quality, protecting worker health, and preventing environmental pollution.

OUR SERVICE

○ **INSTALLATION AND MODIFICATIONS OF PIPELINE WORK**

Installing and modifying water pipelines involves several steps to ensure proper functioning and compliance with safety and regulatory standards. Here's a general overview:

Planning and Design | Site Preparation | Excavation | Pipe Installation | Connection and Fittings

Pressure Testing | Backfilling | Surface Restoration | Testing and Commissioning

○ **FIRE LINE WORK**

Fire line work involves the installation and maintenance of fire protection systems, particularly fire hydrants, fire sprinkler systems, and fire suppression systems. Here's an overview of the typical tasks involved:

Site Assessment and Planning | Design and Engineering | Permitting and Regulatory Compliance | Procurement of Materials | Installation | Testing and Commissioning

Training and Documentation | Maintenance and Inspection

○ **AIR WASHER DUCTING WORK**

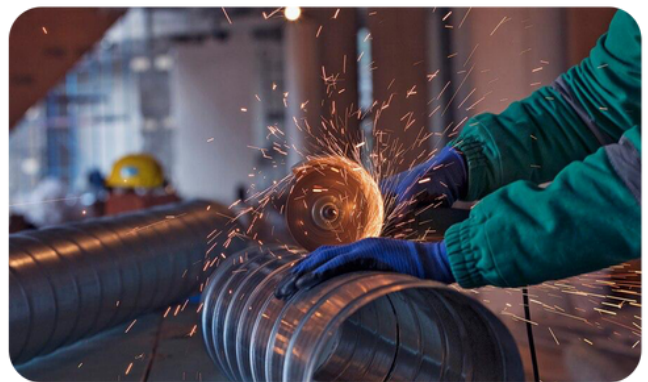

Air washer ducting work involves the installation and maintenance of ductwork systems associated with air washer units. Air washers, also known as evaporative coolers or swamp coolers, are devices that use the evaporation of water to cool and humidify air. The ducting work is crucial for distributing the conditioned air throughout a building or industrial facility.
