MESSAGE FROM DIRECTOR

CRAFTING SOLUTIONS, DELIVERING SUCCESS

One of our greatest strengths lies in our team of dedicated professionals. Their expertise, passion, and collaborative spirit drive our success and enable us to exceed our clients' expectations on every project.

“

At **UCC Constructions**, we have always believed that a well-built foundation is not just essential for structures, but for relationships as well. As the Director of **UCC Constructions**, it gives me immense pride to witness how our company has grown and evolved over the years, establishing a reputation for excellence, integrity, and innovation in the construction industry.

Our journey began with a simple vision: to create spaces that inspire and endure. Today, that vision remains at the core of everything we do. Whether we're constructing a residential development, a commercial building, or an infrastructure project, our commitment to quality, safety, and sustainability is unwavering.

In an ever-changing industry, we embrace innovation and are continually seeking new ways to enhance our processes and improve our services.

As we continue to grow and evolve, our focus remains on providing exceptional service and delivering results that exceed expectations. We are proud of the work we have accomplished and are excited about the opportunities that lie ahead. Together, we will continue to build structures that stand the test of time and contribute to the prosperity of our clients and communities.

Mohamed Ruzni
Director

OUR SERVICE

Excellence in Our Each Engineering Creation

Building Construction

We offer a wide range of services depending on their specialization, expertise, and the needs of their clients. Here's a breakdown of common services provided by such companies: Assessing the viability of a project, including budget estimation, site selection, and analysis of potential risks

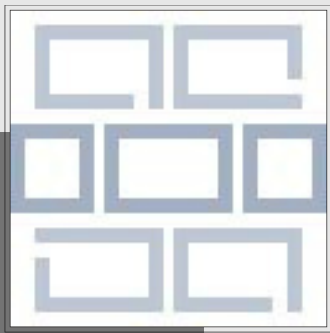

Building Repairs

Upgrading or modifying existing buildings, including interior redesign, structural changes, and modernization. Offering ongoing maintenance services and repairs to ensure the building remains in good condition.

Demolition

The process of dismantling or destroying a building or structure, typically to clear a site for new construction, renovation, or redevelopment. It involves several key steps and considerations

Foundation

Continuous strips of concrete that support load-bearing walls. Commonly used for residential buildings on stable soils. Isolated pads of concrete that support columns or posts. Suitable for buildings with concentrated loads.

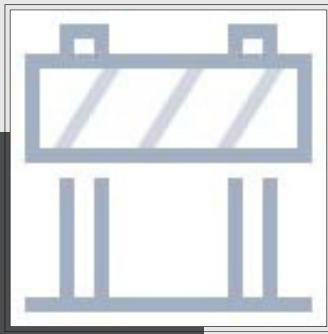

OUR SERVICE

Excellence in Our Each Engineering Creation

Painting & Exterior

Removing dirt, dust, grease, and old paint to ensure proper adhesion of the new paint. Fixing any cracks, holes, or imperfections in the surface. This may involve sanding, patching, and priming.

Site Management

company involves overseeing and coordinating all activities on a construction site to ensure that projects are completed safely, on time, within budget, and to the required quality standards. Here's a comprehensive overview of key aspects involved in site management

Interlocks, Paving & Roadworks

interlocks are modular paving units, often made from concrete, brick, or stone, used to create durable and aesthetically pleasing surfaces for pavements, driveways, and roads. Common types include concrete pavers, brick pavers, and natural stone pavers.

Marble & Granite Works

Marble and granite works are integral to the construction and finishing phases of many projects, particularly in high-end residential, commercial, and institutional buildings. These materials are prized for their beauty, durability, and versatility. Here's an overview of the key aspects involved in marble and granite works

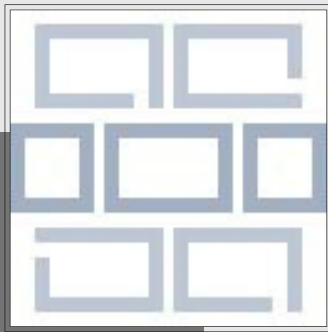

OUR SERVICE

Excellence in Our Each Engineering Creation

Aluminium, Steel & Wood Works

Aluminum, steel, and wood works are essential services in the construction industry, each material offering unique properties and applications. These materials are used in various aspects of building construction, including structural components, finishes, and custom features.

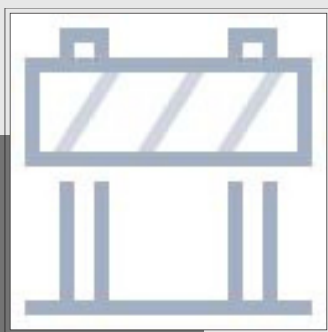

Design Interior & Exterior

Designing both interior and exterior spaces involves a combination of aesthetic appeal, functionality, and integration with the environment. Each aspect requires a thoughtful approach to materials, color schemes, layout

Electrical & Mechanical

Electrical and mechanical services are crucial components of any construction project, ensuring the safe and efficient operation of a building's systems. These services encompass everything from power distribution and lighting to heating

Plumbing & Bathroom Fittings

Plumbing and bathroom fittings are crucial elements in the construction and design of residential, commercial, and industrial buildings. These systems ensure the safe and efficient delivery of water, as well as the removal of wastewater.

OUR SERVICE

Excellence in Our Each Engineering Creation

Civil Works

Civil works encompass a broad range of services related to the construction, maintenance, and infrastructure development of buildings, roads, bridges, and other structures. These services are fundamental to ensuring the stability,

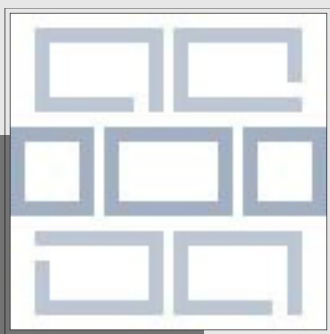

Gypsum Works

Cleaning and preparing the surface, ensuring it is free of dust, grease, and loose particles before applying gypsum plaster. Applying gypsum plaster to interior walls, creating a smooth and even surface that is ready for painting or wallpapering.

Roofing & Ceilings

Roofing and ceiling services are essential in construction, providing structural integrity, protection from the elements, and aesthetic appeal to buildings. These services cover a wide range of activities, from installing and repairing roofs to designing and finishing ceilings.

Pantry Fitouts

Pantry fitouts refer to the design, installation, and organization of a pantry space in a home or commercial setting. A well-executed pantry fitout can enhance storage efficiency, accessibility, and the overall aesthetic of the kitchen.

RUNNING PROJECTS

MEP works (government projects)

Clearly outline the goals, objectives, and deliverables of the construction project. This includes understanding the client's needs, project specifications, and overall expectations.

Villa constructions in Muraikh

Develop a detailed budget that includes all expected costs, such as labor, materials, equipment, permits, and contingencies. Create a project timeline with key milestones, including the start date, major phases, and the expected completion date. Use tools like Gantt charts for visualizing the schedule.

Majlis constructions- Dafna

Finalize the architectural designs, including floor plans, elevations, and structural details. Ensure these are aligned with the client's vision and regulatory requirements. Develop detailed engineering plans for structural, mechanical, electrical, and plumbing systems.

RUNNING PROJECTS

Outhouse Constructions -Wakra/Wukair

Clearly outline the goals, objectives, and deliverables of the construction project. This includes understanding the client's needs, project specifications, and overall expectations.

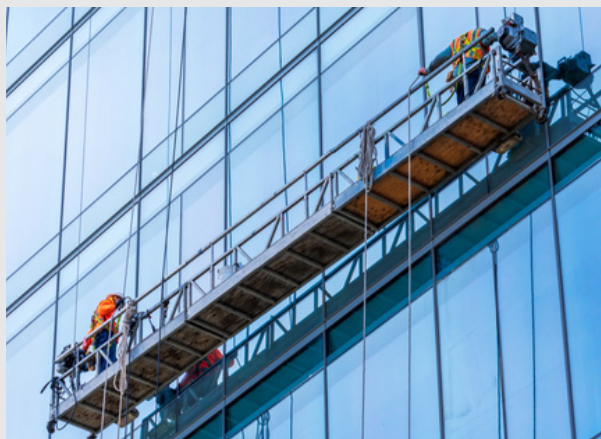

Civil Works

Develop a detailed budget that includes all expected costs, such as labor, materials, equipment, permits, and contingencies. Create a project timeline with key milestones, including the start date, major phases, and the expected completion date. Use tools like Gantt charts for visualizing the schedule.

Building Maintenance & Modifications

Finalize the architectural designs, including floor plans, elevations, and structural details. Ensure these are aligned with the client's vision and regulatory requirements. Develop detailed engineering plans for structural, mechanical, electrical, and plumbing systems.

OUR CLIENTS

Excellence in Our Each Engineering Creation

To achieve sustainable growth and success, we have established various visions with clear goals.
